

# Level 2 Certificate of Competence in Using a Chainsaw from a Rope and Harness (0039-23)

August 2021 Version 1.1

Assessment Pack - Centre Version

Version and date	Change detail	Section
1.0	First version	
1.1 August 2021	Assessor instructions updated	1. Introduction

# Contents

Introduction		4
	204 Using a chainsaw from a rope and harness	6
Appendix 1	Practical tables	14
	204 Using a chainsaw from a rope and harness	15
Appendix 2	Sources of general information	17

# Introduction

This assessment relates to the units in the Qualification handbook. The assessment(s) can be achieved at pass only. If any task is not yet met the candidate is unsuccessful.

This assessment is for unit 204 Using a chainsaw from a rope and harness covering the following learning outcomes:

1. Use a chainsaw from a rope and harness

General guidance on the requirements for assessment can be found in the Assessor Guidance document available on the City & Guilds web site **www.nptc.org.uk** 

The assessor must complete the Practical Table mark sheet for each candidate which should be kept by the assessor for a minimum period of twelve months.

## Record of assessment (ROA)

A prepopulated record of assessment must be completed by the assessor following an assessment. The number of outcomes is listed above, these must be ticked into the relevant met or not met sections of the ROA.

## **ARAS Forms**

An Assessment Result Advice Slip (ARAS form) must be completed by the assessor following an assessment. The ARAS is not a certificate but, based on the evidence of the candidate's performance, is a recommendation to City & Guilds that the candidate is either met or not met the assessment criteria. All feedback is to be recorded by the assessor on the feedback section of the ARAS form.

#### **Assessment Time**

The expected assessment time for this qualification is 1-2 hours.

## Site/workshop requirements:

Trees with branches of 100mm diameter

#### **Equipment/Machinery:**

LOLER compliant climbing equipment with documented evidence, for the Candidate and the Assessor Top handled or rear handled Chainsaw (maximum guide bar 15 inch) with maintenance tools Pulling line and or tape sling

First aid kit

#### **Consumables:**

Fuel and chainsaw oil

This is not an open book assessment, however additional technical information may be sought from the relevant manufactures operator manuals or any other appropriate training or safety publication.

# **Practical observation descriptor table**

# 204 Using a chainsaw from a rope and harness

	vity number and description from check list	Assessment criteria
1.	Identify the hazards, risks and controls associated with the site, task and machine	Identify hazards, risks and controls relevant to the site task and machine
2.	Explain the emergency procedures relevant to the site	Emergency procedures relevant to the work site
3.	State industry guides relevant to using a chainsaw from a rope and harness	Industry guides relevant to using a chainsaw from a rope and harness:  • AA Technical guide 1 Tree climbing and aerial rescue  • AA Technical guide 2 Use of tools in a tree  • Recommendations for tree work BS3998
4.	Describe site zoning in relation to on site preparation	Worksite layout factors to consider may include:  • work zone: an area where hazards may be encountered  • drop zone: an area where it is anticipated materials may fall  • exclusion zone: the overall operational area  • other
5.	Explain how to evaluate the tree for hazards and the implications of the hazards when identified	Tree evaluation may be carried out via:  • visual observation • hazard evaluation report • other Implications of the hazards when identified may include: • physical injury • damage to equipment • damage to retained part of the tree • disruption to wildlife • other
6.	Perform a tree condition assessment of the tree and work at height assessment prior to commencing the work	Potential hazards that may be encountered may include:  • evidence of cavities, decay or decay fungi  • deadwood and broken branches  • dead or flaking bark  • v shaped unions  • cracks

		nesting insects
		<ul> <li>the presence of power lines or</li> </ul>
		telephone wires
		<ul> <li>targets and obstacles underneath</li> </ul>
		the tree
		can the work be carried out from
		ground level
		the use of a Mobile elevating
		work platform (MEWP) to
		prevent a fall
		The use of suitable equipment
		minimises the distance and
		consequence of a fall
	Explain how the species, condition of trees and	Species, condition of tree and time of
	time of year affect the work	year may affect the work owing to:
	time of year affect the work	, ,
		Species:
		brittle timber – loss of control
		<ul> <li>responses to pruning</li> </ul>
		• other
		Condition:
_		dead – loss of control, safety
7.		compromised
		diseased – biosecurity measures
		other
		Time of year:
		some species bleed heavily if
		pruned at certain times of year
		<ul> <li>promotion of subsequent disease</li> </ul>
		or infection
		other
	Use and maintain tools, equipment and	Candidate to select compliant PPE
	personal protective equipment (PPE)	and safety clothing for tree climbing
		and chainsaw use to include:
		<ul> <li>tree climbing helmet</li> </ul>
		<ul> <li>personal first aid kit</li> </ul>
		<ul> <li>knife with retractable blade</li> </ul>
		or handsaw
		chainsaw safety footwear
		with good grip and ankle
		support
8.		non- snag clothing
		eye protection
		<ul> <li>hearing protection</li> </ul>
		<ul> <li>chainsaw protective clothing</li> </ul>
		appropriate chainsaw with
		lanyard.
		Hand tools:
		<ul> <li>appropriate size</li> </ul>
		<ul> <li>suitable for the task</li> </ul>
		<ul> <li>guarded as appropriate</li> </ul>

		<ul> <li>maintained</li> </ul>
		Candidate to select appropriate compliant climbing equipment for tree climbing
9.	Inspect all access/tree climbing equipment to ensure it is safe and fit for use under manufacturer's instructions and relevant legislation	Candidate to inspect all equipment to be used and comment on the condition/checks made.
10.	Explain the basic principles of target pruning	Basic principles of target pruning are to:  • simulate the trees natural ability to shed branches  • leaves the branch bark ridge and collar intact  • allow complete doughnut of callus wood to be able to form  • allow protection boundary to develop inside collar  • other
11.	Explain different cuts and when they may be used	Cuts that maybe used and their application:  Sink cut:  directional sink with back cut retaining hinge which aides direction used on free fall and hand held sections  Step cut:  two over lapping cuts used on free fall and hand held sections  Inboard:  finishing cut towards main stem, reducing risk of saw being taken  Out board:  finishing cut away from main stem, timber falls flat and reduces the risk of tearing  V cut:  two joining directional sinks with back cut, used on smaller diameter stems under tension

		Holding cut:     sink cut with retained hinge and hold at the rear, used on larger diameter stems under tension
12.	Describe the use of associated equipment to aid removal of sections	The use of equipment to aid with the removal of tree sections may include:  • tape sling used on end of limb to act as lever/hand hold for step cut hand held sections  • pull line used to help the removal of cut sections  • handsaw light weight cutting aid  • other
13.	State the potential effects of tree section removal on the retained parts of the tree	Tree section removal may have the effect of:
14.	Explain the importance of accurate and appropriate cuts	Importance of accurate cuts may include:

15.	Explain the procedure for removing a trapped saw	The procedure for releasing a trapped saw when working in the crown should be:  • switch of the engine or apply chain brake  • release the saw from the climbing harness where the risk exists of the saw being taken with the cut section  • attach the saw to the tree inboard of the cut or to a separate branch or tool line  • pull the saw from the kerf, lifting the branch as necessary  • if necessary, use a second saw to release the trapped saw, cutting a minimum of 300mm (12") away from the trapped saw  • other
16.	Describe when it is acceptable to use a chainsaw one handed	It may be necessary to use a top handled chainsaw in the tree one-handed:  • when working at the extremity of limbs and cutting is required while the other hand is needed to maintain the work position • when two-handed operation cannot be carried out safely • when a chainsaw is used with one hand it must be out of alignment with the operator and all climbing equipment
17.	Explain how to select appropriate anchor points/position of access equipment so the anchor point will not be compromised by the work being carried out	Selection of appropriate anchor points may include:
18.	Use access and positioning methods appropriate to the tree	All anchor points selected taking into consideration:  • size, strength and structure  • position in relation to the parts of the tree to be accessed  • use of equipment to minimise damage to the tree if appropriate

		Candidate establishes their initial anchor points taking into account:  • suitability of the techniques used • accurate installation of equipment • organisation of ropes • safety and position of the anchor points • testing of the anchor points by thorough loading prior to ascent
		<ul> <li>Technique used takes into account:</li> <li>efficient use of technique chosen</li> <li>candidate is attached to the tree at all times in accordance with industry good practice</li> <li>appropriate selection of anchor points</li> <li>appropriate route taken up the tree</li> <li>correct use of systems when changing anchor points</li> <li>thorough load testing of new anchor points</li> <li>risk of a fall is managed at all times correct use of equipment</li> </ul>
19.	Identify desired drop zone	Candidate to identify a clear drop zone to be used during the removal of timber using free-fall techniques
20.	Demonstrate appropriate cuts	Climber achieves position to receive the chainsaw. Work position for cutting attained:  • chain brake applied or saw switched off whilst position attained  • appropriate working position attained with the climber in a balanced and stable position to use the saw  • the use of load bearing supplementary anchor points as appropriate  Step cut and sink cut sections should be removed, both free fall and hand

		held, taking The following points into account:
21.	Use associated equipment to aid removal of sections into desired drop zone to protect infrastructure and targets	smooth as possible  Candidate to use associated equipment such as:  • tape sling  • pull/tag line  • other
22.	Dispose of waste in line with work specification	All waste produced from activities is disposed of in line with legislation, good practice and/or site requirements
23.	Communicate appropriately with ground staff	Communication between climber and ground staff maintained when appropriate
24.	Used appropriate tools, equipment and personal protective equipment (PPE)	All tools, equipment and personal protective equipment is used in line with industry good practice

25.	Carried out work to minimise environmental damage	It is ensured that any possible environmental damage is minimised at all times.
26.	Worked in a way which maintains health and safety and is consistent with relevant legislation and industry good practice	All activities must be completed in a way which protects the operator and those around them

# 204 Using a chainsaw from a rope and harness

Candidate name:	
Date:	
Start time:	
Finish time:	

All criteria must be achieved.

Activity	number and description	Achieved
1.	Identify the hazards, risks and controls associated with the site, task and machine	
2.	Explain the emergency procedures relevant to the site	
3.	State industry guides relevant to using a chainsaw from a rope and harness	
4.	Describe site zoning in relation to on site preparation	
5.	Explain how to evaluate the tree for hazards and the implications of the hazards when identified	
6.	Perform a tree condition assessment of the tree and work at height assessment	
	prior to commencing the work	
7.	Explain how the species, condition of trees and time of year affect the work	
8.	Use and maintain tools, equipment and personal protective equipment (PPE)	
9.	Inspect all access/tree climbing equipment to ensure it is safe and fit for use under manufacturer's instructions and relevant legislation	
10.	Explain the basic principles of target pruning	
11.	Explain different cuts and when they may be used	
12.	Describe the use of associated equipment to aid removal of sections	
13.	State the potential effects of tree section removal on the retained parts of the tree	
14.	Explain the importance of accurate and appropriate cuts	
15.	Explain the procedure for removing a trapped saw	
16.	Describe when it is acceptable to use a chainsaw one handed	
17.	Explain how to select appropriate anchor points/position of access equipment so the anchor point will not be compromised by the work being carried out	
18.	Use access and positioning methods appropriate to the tree	
19.	Identify desired drop zone	
20.	Demonstrate appropriate cuts	
21.	Use associated equipment to aid removal of sections into desired drop zone to protect infrastructure and targets	
22.	Dispose of waste in line with work specification	
23.	Communicate appropriately with ground staff	
24.	Used appropriate tools, equipment and personal protective equipment (PPE)	
25.	Carried out work to minimise environmental damage

#### **Sources of general information** Appendix 2

The following documents contain essential information for centres delivering City & Guilds qualifications. They should be referred to in conjunction with this handbook. To download the documents and to find other useful documents, go to the Centres and Training Providers homepage on www.nptc.org.uk

# City & Guilds Centre Manual

This document provides guidance for organisations wishing to become City & Guilds approved centres, as well as information for approved centres delivering City & Guilds qualifications. It covers the centre and qualification approval process as well as providing guidance on delivery, assessment and quality assurance for approved centres.

It also details the City & Guilds requirements for ongoing centre and qualification approval, and provides examples of best practice for centres. Specifically, the document includes sections on:

- the centre and qualification approval process
- assessment, internal quality assurance and examination roles at the centre
- registration and certification of candidates
- non-compliance and malpractice
- complaints and appeals
- equal opportunities
- data protection
- management systems
- maintaining records
- internal quality assurance
- external quality assurance.

## **Our Quality Assurance Requirements**

This document explains the requirements for the delivery, assessment and awarding of our qualifications. All centres working with City & Guilds must adopt and implement these requirements across all of their qualification provision. Specifically, this document:

- specifies the quality assurance and control requirements that apply to all centres
- sets out the basis for securing high standards, for all our qualifications and/or assessments
- details the impact on centres of non-compliance

Our Quality Assurance Requirements document encompasses the relevant regulatory requirements of the following documents, which apply to all UK centres working with City & Guilds:

Ofqual's General Conditions of Recognition

The centre homepage section of the City & Guilds website also contains useful information on

- Walled Garden: how to register and certificate candidates on line
- Events: dates and information on the latest Centre events
- **Online assessment**: how to register for e-assessments.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. However, City & Guilds' products and services are subject to continuous development and improvement and the right is reserved to change products and services from time to time. City & Guilds cannot accept liability for loss or damage arising from the use of information in this publication.

If you have a complaint, or any suggestions for improvement about any of the services that we provide, email: **feedbackandcomplaints@cityandguilds.com** 

## **About City & Guilds**

As the UK's leading vocational education organisation, City & Guilds is leading the talent revolution by inspiring people to unlock their potential and develop their skills. City & Guilds is recognised and respected by employers across the world as a sign of quality and exceptional training.

## **City & Guilds Group**

The City & Guilds Group operates from three major hubs: London (servicing Europe, the Caribbean and Americas), Johannesburg (servicing Africa), and Singapore (servicing Asia, Australia and New Zealand). The Group also includes the Institute of Leadership & Management (management and leadership qualifications), City & Guilds Licence to Practice (land-based qualifications) and Learning Assistant (an online e-portfolio).
