**Candidate information**

If you are not satisfied with the assessment outcome, please contact your assessment centre for information on their appeals process.

Certification will be issued directly to your assessment centre. If you do not receive your certificate within 20 days, please contact your assessment centre in the first instance.

If City & Guilds NPTC are not notified of a missing certificate within 30 days, a charge will be applied for a replacement to be issued.

**234 Initial practical assessment prior to sheep being dipped**

| AC     | Description                                                                                                                                                                              | Outcome     |             |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------|
| 1.1    | Outline the essential factors to include in an overall strategy to control external parasites for a specified flock                                                                      | Met         | Not Met     |
| 1.2    | State the procedures to consider when accurately identifying specific external parasites                                                                                                 | Met         | Not Met     |
| 1.3    | Identify the essential contents of a product data sheet/product label                                                                                                                    | Met         | Not Met     |
| 1.4    | State the groups of product types for the treatment of external parasites in sheep                                                                                                       | Met         | Not Met     |
| 1.5    | Calculate capacity of dip bath and the quantity of concentrate dip required                                                                                                              | Met         | Not Met     |
| 1.6    | Select and put on PPE as specified on the data sheet/product label/COSHH assessment                                                                                                      | Met         | Not Met     |
| 1.7    | Add concentrate dip replenishment to a stated quantity of liquid in dip                                                                                                                  | Met         | Not Met     |
| 1.8    | Clean, remove and store PPE safely                                                                                                                                                       | Met         | Not Met     |
| 1.9    | Assess and report on the effective safe “run-off” from sheep after dipping and the importance of keeping freshly dipped sheep away from water courses                                    | Met         | Not Met     |
| 1.10   | Operate the engineering controls on a sheep dip (static or mobile) and state the reasons for the siting, construction and maintenance of the dip, including collecting and draining pens | Met         | Not Met     |
| 1.11   | Outline the essential safety points necessary for the safe disposal of used dilute product from the dip                                                                                  | Met         | Not Met     |
| 1.12   | Outline the factors to consider when using alternatives to plunge dipping for the control of external parasites                                                                          | Met         | Not Met     |
| 1.13   | State why animal welfare is essential for those undertaking the dipping of sheep                                                                                                         | Met         | Not Met     |
| 1.14   | State the precautions to be taken before persons involved in the dipping operation eat, drink, smoke, or use the toilet                                                                  | Met         | Not Met     |
| 1.15   | State the factors to record following each dipping operation                                                                                                                             | Met         | Not Met     |
| Result |                                                                                                                                                                                          | <b>Pass</b> | <b>Fail</b> |

**235 Practical sheep dipping**

| AC     | Description                                                                                                                       | Outcome     |             |
|--------|-----------------------------------------------------------------------------------------------------------------------------------|-------------|-------------|
| 1.1    | State the requirements for storing concentrate sheep dip                                                                          | Met         | Not Met     |
| 1.2    | Maintain diluted dip in good condition                                                                                            | Met         | Not Met     |
| 1.3    | State the reasons for delaying the dipping operation                                                                              | Met         | Not Met     |
| 1.4    | Identify that sheep are in acceptable condition for dipping                                                                       | Met         | Not Met     |
| 1.5    | Working as the key operator, dip at least fifteen sheep in a plunge bath which is designed and operable to an acceptable standard | Met         | Not Met     |
| Result |                                                                                                                                   | <b>Pass</b> | <b>Fail</b> |
