City and Guilds NPTC Level 2 Award in Safe Use of Pesticides Replacing Grandfather Rights (PAGR) Qualification Guidance

Introduction

The scheme will be administered by City & Guilds

City & Guilds will:

- Publish
 - Scheme regulations
 - Qualification guidance
 - Training material
 - Trainers support material
- Approve Centres to co-ordinate and administer the scheme
- Set standards for the training of Verifiers and Assessors
- Recruit, train and deploy Verifiers
- Manage verification
- Issue Certificates to successful Candidates

The Qualification

This qualification is specifically for those who were previously exempt under 'Grandfather Rights' who apply pesticides on land they own or occupy. From 26th November 2015 under the requirements of the Plant Protection Products (Sustainable Use) Regulation (2012) – a training certificate or Certificate of Competence is required for anyone who is going to apply any professional product. This qualification satisfies those requirements and will be awarded to Candidates who achieve the required level of competence in the units to which their Certificate relates.

Training

The Code of Practice for Using Plant Protection Products states; "By Law everyone who uses pesticides professionally must have received adequate training in using pesticides safely". Candidates are strongly advised to ensure that they will be able to meet the standards required in the assessment.

Total Qualification Time

Total Qualification Time (TQT) is the total amount of time, in hours, expected to be spent by a Learner to achieve a qualification. It includes both guided learning hours (which are listed separately) and hours spent in preparation, study and assessment.

Access to Assessment

Assessment Centres will be responsible for arranging the assessment on behalf of the Candidate.

Only candidates born **before 31st December 1964** are eligible to take this qualification. There is no upper age limit.

The assessment consists of **one** compulsory unit and **three** optional units:

Unit 051	(Mandatory)	(Credit Value 3)	(Print pages 6 - 9 plus 34)
Outcome 1.	Know the legislative requirements and codes of practice relating to the use of pesticides on own land (Criteria 1.1 – 1.2)		
Outcome 2.	Understand the relevance of pesticide product information (Criteria 2.1 – 2.1)		
Outcome 3.	Understand how to minimise the risk of human contamination and implement emergency procedures (Criteria 3.1 – 3.4)		
Outcome 4.	Know how to store and transport pesticides safely (Criteria 4.1 – 4.2)		
Outcome 5.	Know how to manage and dispose of surplus pesticide and waste materials (Criteria 5.1 – 5.2)		
Outcome 6.	Know the record keeping requirements associated with pesticide operations (Criteria 6.1 – 6.1)		
Outcome 7.	Understand how to minimise the risk of environmental contamination and implement emergency procedures (Criteria 7.1 – 7.1)		
Unit 052	(Optional)	(Credit Value 3)	(Print pages 10 – 14 plus 34)
Outcome 1.	Know the legislative and safety regulations relating to sprayer/applicator use on own land (Criteria 1.1 – 1.2)		
Outcome 2.	Understand the environmental factors relating to mixing and application of pesticides (Criteria 2.1 – 2.2)		
Outcome 3.	Be able to read and interpret product information (Criteria 3.1 – 3.2)		
Outcome 4.	Be able to prepare and calibrate a hand held pedestrian applicator (Criteria 4.1 – 4.7)		
Outcome 5.	Be able to operate the application equipment to apply pesticides onto own land (Criteria 5.1 – 5.4)		
Outcome 6.	Understand how to carry out post-operational procedures (Criteria 6.1 – 6.3)		
Unit 053	(Optional)	(Credit Value 3)	(Print pages 15 – 24 plus 34)
Outcome 1.	Know the legislative and safety regulations relating to application equipment on own land (Criteria 1.1 – 1.2)		
Outcome 2.	Be able to assess the environmental factors relating to the mixing and application site (Criteria 2.1 – 2.2)		
Outcome 3.	Be able to read and interpret pesticide product information (Criteria 3.1 – 3.2)		
Outcome 4.	Be able to prepare and calibrate the applicator (Criteria 4.1 – 4.5)		
Outcome 5.	Be able to operate the application equipment to apply pesticides on own land (Criteria 5.1 – 5.4)		
Outcome 6.	Understand how to carry out post-operational procedures (Criteria 6.1 – 6.3)		
Unit 054	(Optional)	(Credit Value 3)	(Print pages 25 - 34)
Outcome 1.	Know the legislative and safety regulations relating to application equipment on own land (Criteria 1.1 – 1.2)		
Outcome 2.	Be able to assess the environmental factors relating to the mixing and application site (Criteria 2.1 – 2.2)		
Outcome 3.	Be able to read and interpret product information (Criteria 3.1 – 3.2)		
Outcome 4.	Be able to prepare and calibrate other specific equipment (Criteria 4.1 – 4.7)		
Outcome 5.	Be able to operate the application equipment (Criteria 5.1 – 5.4)		
Outcome 6.	Know how to carry out post-operational procedures (Criteria 6.1 – 6.3)		

Candidates must successfully achieve **all** assessment activities in the **mandatory unit** and **one, or more** optional unit.

Mandatory Unit – Unit 1 The principles of safe handling and application of pesticides on own land	
--	--

Plus one optional unit from any of the following:

Optional Units	Type of equipment covered by the unit
Unit 2 Hand held pesticide application on own land	Hand held applicators; hydraulic and atomiser types, application to water using hydraulic and atomiser types, slug pellet applicators, granule applicators to land, granule applicators to water and any other type of hand held applicator.
Unit 3 Operating machines to apply pesticides to own land	All types of mounted boom sprayer, all types of mounted wick applicators, mounted or trailed broadcast sprayers, mounted or trailed variable geometry boom sprayers with/without air assistance, mounted or trailed pellet or granular applicators.
Unit 4 Applying pesticides using other specific equipment or methods	Fogging, misting and smokes, batch dipping, seed treating equipment, application of pesticides to material as a continuous process, sub surface liquid pesticide application, all types of boat mounted applicators and any other item of pesticide equipment not covered in units 2 and 3.

There are no endorsements for this Award.

Quality Assurance

Verification is a process of monitoring assessment; it is an essential check to confirm that the assessment procedures are being carried out in the way City & Guilds has specified. The overall aim of Verification is to establish a system of quality assurance that is acceptable in terms of both credibility and cost effectiveness.

Approved Assessors will be subject to a regular visit by a Verifier at a time when assessments are being undertaken.

Documents completed by the Assessor may be inspected by a Centre appointed Internal Verifier and a City & Guilds approved Verifier at any time.

Compliance with the verification requirements is a pre-requisite for Assessors remaining on the list of approved Assessors.

After assessment has been completed the Qualification Guidance is to be retained by the Assessor for 12 months and is to be made available for inspection by a Centre appointed Internal Verifier, a City & Guilds approved Verifier or when a centre visit takes place by a Quality Systems Consultant (QSC).

Performance Evaluation

The result of each assessment activity is evaluated against the following criteria:

M = Met Meets or exceeds the assessment criteria by displaying a level of practical performance and/or underpinning knowledge. If the Criterion has been MET, a tick is to be put in the box provided in the bottom right-hand column of each section.

NM = Not Met Does not satisfy the requirements of the assessment criteria, being unable to perform the practical task satisfactorily or safely or having insufficient underpinning knowledge. If the Criterion is NOT MET, a cross is to be put in the box provided in the bottom right-hand column of each section.

Appeals and Equal opportunities

Centres must have their own auditable, appeals procedures. If a Candidate is not satisfied with the examination conditions or a Candidate feels the opportunity for examination is being denied, the Centre Manager should, in the first instance, address the problem. If, however the problem cannot be resolved, City & Guilds will arbitrate and a Principal Verifier may be approached to offer independent advice. All appeals must be clearly documented by the Centre Manager and made available to the Principal Verifier or City & Guilds if advice is required.

Should occasions arise when Centres are not satisfied with any aspect of the verification process, they should contact the Quality Assurance Manager at City & Guilds NPTC, Building 500, Abbey Park, Stareton, Warwickshire, CV8 2LY. Telephone 024 7685 7300

Access to the qualification is open to all, irrespective of gender, race, creed or special needs. Subject to H&S restrictions the Centre Manager should ensure that no learner is subjected to unfair discrimination on any grounds in relation to access to assessment and to the fairness of the assessment. QCA requires City & Guilds to monitor centres to check whether equal opportunities policies are being adhered to.

Validation of Equipment

All equipment being used for this assessment must comply with the relevant requirements of the Provision and Use of Work Equipment Regulations (PUWER) 1998.

Vehicles must comply with Department of Transport and Road Traffic Acts where relevant.

Any machinery/equipment complying with current legal requirements is acceptable for the assessment, provided it is suitably equipped for **all** assessment activities to be carried out.

Summary of responsibilities in the assessment process		
Centre responsibilities	Candidate responsibilities	Assessor responsibilities
A suitable site is made available for the assessment to take place		Ensuring that the site provided is suitable for the assessment to take place
Machinery, equipment and materials are available to enable assessment of all the activities to take place	To be familiar with the machinery/equipment being used for the assessment	Ensuring that the machinery, equipment and materials provided satisfy the assessment requirements
	To bring appropriate Personal Protective Equipment (PPE) to the assessment	Ensuring that candidate's PPE complies with the requirements of the assessment
	To bring relevant training materials (including calibration sheet if applicable)	
	To bring a product label appropriate for the assessment	To ensure that the product label is appropriate for the assessment (or provide a suitable alternative)

Safe Practice

The Assessor and Candidate must wear Personal Protective Equipment (PPE) when appropriate.

The Assessor must ensure that a Site Specific Risk Assessment is carried out.

All equipment must be operated in such a way that the Candidate, Assessor, other persons and the environment are not endangered. Failure to operate safely and comply with these requirements will result in the Candidate not meeting the required standard.

A breach of Health and Safety that puts any person at risk during the assessment process will result in the assessment being terminated and the Candidate not meeting the required standard. The Assessor may stop the assessment on the grounds of safety at any time at their discretion.

Before any assessments take place, Assessor & Candidate should to be aware of any local or national issues to prevent breach of security, safety and any cross contamination or damage to the local environment.

Information

The candidate may refer to operator manuals, training materials (including the workbook for this qualification) or safety publications during the assessment. But they **may not** refer to the Qualification Guidance Document **during the assessment**.

Questions should be related to the background or employment aspirations of the candidate.

Candidates who undertake this assessment and have met the requirements are reminded of their legal obligation to receive/undertake appropriate additional training in the use of any equipment that differs from that used during the assessment, but which they are nevertheless qualified to use.

Assessment Guidance for the Assessor

This qualification can only be assessed by an Assessor who is suitably qualified and meets the requirements of the awarding body. The Assessor must be independent **and cannot have been involved with the training of the Candidate**. Please see City & Guilds Centre Manual for guidance.

The Candidate is to be notified of the place and time of assessment and when formal assessment commences and ceases.

Assessors are reminded that assessment is a formal process and that assessment must be carried out using this Qualification Guidance. All relevant assessment criteria must be assessed as specified in the Qualification Guidance. Assessment will be carried out by direct observation and by oral questioning of the Candidate. **Where a specific number of responses are required these may include other suitable answers not specified if they are deemed to be correct by the Assessor.** The performance of the Candidate is to be recorded on the Qualification Guidance as directed by completing the tick boxes. Space has been provided on the Qualification Guidance for the person assessing to record relevant information which can be utilised to provide feedback to the Candidate. After assessment has been completed the Qualification Guidance document is to be retained by the assessor and provided if required.

Assessment Guidance for the Candidate

A list of registered Assessment Centres is available from City & Guilds NPTC. (www.nptc.org.uk)

Assessment is a process by which it is confirmed that the candidate is competent in the unit(s) within the award to which the assessment relates. It is the process of collecting evidence about their capabilities and judging whether that evidence is sufficient to attribute competence.

The Candidate must be registered through the City & Guilds approved Assessment Centre for this qualification prior to the assessment.

The results of the assessment will be recorded on the Record of Assessment form (ROA).

The Qualification Guidance contains criteria relating to:

- Observation of practical performance
- Assessment of underpinning knowledge

Unit 051 – The Principles of the Safe Handling and Application of Pesticides on own Land

Candidate A	Name:	Date:	Start Time:	Duration:
Candidate B	Name:	Date:	Start Time:	Duration:
Candidate C	Name:	Date:	Start Time:	Duration:
Candidate D	Name:	Date:	Start Time:	Duration:

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 051 1.1	Identify an operators responsibilities under current legislation relating to the use of pesticides on own land	<p>Note to the Assessor: the candidate is required to outline one key point from each piece of legislation specifically affecting pesticide legislation in bold, no's 3,4 and 5</p> <p>Note to the Assessor: the candidate is required to outline four key areas in bold covered by The Plant Protection Products (Sustainable Use) Regulations (2012)</p>	<p>Includes compliance with:</p> <ul style="list-style-type: none"> 1. The Health & Safety at Work Act (1974) - specified duties under the act as an employer, employee or self employed person 2. The Management of Health and Safety at Work Regulations (1999) - a risk assessment must be carried for all activities 3. Control of Substances Hazardous to Health Regulations (2002) - a COSHH assessment must be carried out and complied with 4. The Control of Pesticide Regulations (1986) - only certified operators may use professional products 5. Personal Protective Equipment Regulations (1992) - PPE must be supplied, and worn 6. Manual Handling Operations Regulations (1992) - not to manually handle, use safe lifting techniques 7. Provision and Use of Work Equipment Regulations (1998) - requires that regular checks are made to machinery and equipment 8. Wildlife and Countryside Act (1981) - operations must be carried out at times to minimise the impact on wildlife <p>And the:</p> <p>The Plant Protection Products (Sustainable Use) Regulations (2012), which encompass the following:</p> <ul style="list-style-type: none"> Users of pesticides need to take reasonable precautions to protect human health and the environment when storing, handling, using and disposing of pesticides keep up to date with pesticide related legislation use only currently authorised and legal pesticides, be aware of illegal or counterfeit products, buy only from reputable sources, check that the product delivered matches the product ordered anyone purchasing a professional product must ensure that the end user holds a certificate of competence for application a person using a pesticide must receive adequate training for the task and hold a training certificate or Certificate of Competence unless working under direct supervision consider using alternative methods to pesticide application e.g. Integrated Pest Management or Integrated Weed Management preference should be given to products not classified as dangerous for the aquatic environment nor containing priority hazardous substances when the use of the product represents a risk to water quality 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Continued				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Cont... Unit 051 1.1			<ul style="list-style-type: none"> the amount of pesticide used and frequency is a low as reasonably practicable on: Roads, Railway lines, very permeable surfaces and sealed surfaces where there is a greater risk of run off or contamination of surface and groundwater; areas used by the general public or vulnerable groups; areas in the close vicinity of healthcare facilities; protected areas identified under the Water Framework Directive; and areas recently treated by pesticides which will be accessible to agricultural workers equipment must be inspected in line with current legislative requirements application must be confined to the intended target <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 1.2	Identify an operators responsibilities under current codes of practice relating to the use of pesticides on own land	Candidate to provide two responsibilities under current codes of practice	May include: <ul style="list-style-type: none"> follow current Code of Practice for the safe use of pesticides use pesticides in a safe manner carry out and comply with an environmental assessment of the application site ensure that equipment is in good condition the application equipment has been correctly calibrated <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 2.1	Explain the relevance of product label information	Candidate to provide four explanations relating to the relevance of product label information	May include: <ul style="list-style-type: none"> Important information – must be strictly complied with hazards associated with the product environmental precautions PPE requirements active substance(s) – in the event of an emergency approved field of use – the industry sector for which the product is approved maximum dose rate – must not be exceeded timing of application(s) – manufacturer’s recommendations must be followed current authorisation number – evidence of authorisation approved adjuvants – only approved adjuvants can be used as recommended <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 3.1	Identify possible routes of pesticide contamination	Candidate to identify three possible routes of contamination	May include: <ul style="list-style-type: none"> through the eye absorption through the skin inhalation ingestion injection <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 3.2	Identify appropriate Personal Protective Equipment (PPE) for pesticide application	Candidate to identify all items of PPE that may be required for pesticide application and state the importance of quality marks, type and condition	Quality standard marks e.g. CE Mark. type, condition and features of: <ul style="list-style-type: none"> gloves coveralls face shields footwear respirators <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 3.3	Identify the symptoms of pesticide contamination	Candidate to state two symptoms of pesticide contamination	May include: <ul style="list-style-type: none"> headache nausea stomach pains rashes/blistering of skin <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 051 3.4	Explain appropriate procedures for dealing with pesticide contamination	Candidate is required to explain how to deal only with contamination	Appropriate procedures for dealing with pesticide contamination include: <ul style="list-style-type: none"> self – rapidly identify contamination and decontaminate, remove contaminated PPE and clothing, seek medical advice if needed third parties – protect yourself, relocate to safe area, decontaminate if possible, remove contaminated PPE and clothing contact emergency services information access – product label and the Material Safety Data sheet (MSDS) made available <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 4.1	State how pesticides should be stored	Candidate is required to state three ways in which pesticides should be stored	To include: <ul style="list-style-type: none"> in original container, with product labels maintain stock security to avoid theft and misuse careful handling to reduce chances of spillage adequate containment facilities product segregation to avoid dangerous occurrences <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 4.2	State how pesticides should be transported	Candidate is required to state two ways in which pesticides should be transported	<ul style="list-style-type: none"> mobile storage is secure and meets current codes of practice careful handling to reduce chances of spillage adequate containment facilities return unused concentrated pesticide to the store maintain stock security to avoid theft and mis-use <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 5.1	Identify appropriate methods of reducing waste from pesticide application	Candidate to identify one way to reduce waste from pesticide application	May include: <ul style="list-style-type: none"> accuracy of calibration calculations correct mixing of pesticides correct calibration of sprayer/applicator <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 5.2	State how to manage and dispose of surplus concentrate and dilute pesticides	Candidate to state two ways in which to manage and dispose of surplus concentrate and dilute pesticides	For concentrated pesticide it may include: <ul style="list-style-type: none"> collected by a licensed waste disposal contractor return to supplier if currently approved For dilute pesticide it may include: <ul style="list-style-type: none"> back on to the site/target as long as it is below the maximum dose rate treated by a specialist treatment facility on site (e.g. a lined bio bed) <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 5.3	State how to manage and Dispose of waste materials arising from pesticide operations	Candidate to state three ways in which to manage and dispose of waste materials arising from pesticide operations	May include: <ul style="list-style-type: none"> dealing appropriately with empty packaging and containers - licensed waste disposal contractor triple rinse manually container disposal - licensed waste disposal contractor secure storage until disposal return to the supplier collected by a licensed waste disposal contractor for disposal if out of approval or suspect in any other way (e.g. counterfeit) <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 6.1	Identify the records required to comply with legislation and best practice in respect to pesticide operations	Candidate to identify two records required to comply with legislation and best practice	May include: <ul style="list-style-type: none"> training records environmental assessment records COSHH assessment records control measure records duplicate stock records (storage records) pesticide treatment records waste transfer notes <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 051 7.1	Identify the risks to the environment from pesticides	Candidate to identify two risks to the environment from pesticides	May include: <ul style="list-style-type: none"> • pollution of water and the aquatic environment • pollution of specially designated areas • pollution or destruction of wildlife habitats • off target application/contamination <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 7.2	Describe how to carry out pesticide application to minimise the risk to the environment	Candidate to describe three ways in which to carry out pesticide application to minimise the risk to the environment	May include: <ul style="list-style-type: none"> • reasonable precautions must be taken to protect the environment • application must be confined to the intended target • application carried out at an appropriate time of day • protection of human health and the environment • apply only in suitable weather conditions • Informing neighbours/other interested parties • protection of the public accessing rights of way <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 051 7.3	Explain appropriate procedures for dealing with environmental contamination from pesticides	Candidate to describe how to deal with one spillage and suspected animal poisoning	May include: <ul style="list-style-type: none"> • dealing with minor spillages – containment, collection and disposal • dealing with major spillages – contain if possible, Inform appropriate Environmental Agency and the emergency services • dealing with suspected animal poisoning – phone Wildlife Incident Investigation Scheme <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Unit 052 – Hand Held Pesticide Application on own Land

Candidate A	Name:	Date:	Start Time:	Duration:
Candidate B	Name:	Date:	Start Time:	Duration:
Candidate C	Name:	Date:	Start Time:	Duration:
Candidate D	Name:	Date:	Start Time:	Duration:

Unit 052 1.1	Describe the legal requirements relating to applying pesticides using pedestrian operated hand held application equipment to own land	Candidate to describe one legal obligation in terms of the requirements on the operator Assessor to note: if already assessed in unit one , this criteria need not be re-assessed	May include: <ul style="list-style-type: none"> comply with the current Pesticide Code of Practice comply with The Plant Protection Products (Sustainable Use) (Regulations 2012) ensuring that the equipment is in good condition and all required guards are in place as stated in the operators manual (if applicable) 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Met ✓ Not Met X				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 1.2	Describe how to apply pesticides safely using hand held pedestrian equipment to own land following industry best practice	Candidate to describe one operator safety regulation in terms of using hand held pedestrian equipment Candidate to describe the operational features of both overall and spot treatment - three are required for each technique	May include: <ul style="list-style-type: none"> comply with codes of best practice be aware of any safety implications imposed by Risk/COSHH Assessment and comply with the requirements Overall treatment includes: <ul style="list-style-type: none"> consistent walking speed regular pumping to maintain constant pressure consistent nozzle height accurate on/off points matching of bouts avoidance of 'off target' application Spot treatment includes: <ul style="list-style-type: none"> use of a suitable nozzle maintaining a suitable height timed applications avoidance of under/over dosing avoidance of 'off target' application 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Met ✓ Not Met X				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 2.1	Identify risks to the environment when mixing and applying pesticides	Candidate to identify five possible risks to the environment	May include any of the following: <ul style="list-style-type: none"> 'run off' if the ground conditions are not suitable pollution of water courses pesticide entering drains pollution of boreholes, water protection zones pesticide contamination of environmental margins detrimental affect on wildlife application to non-target plants damage to sensitive crops/areas damage to hedgerows affecting housing limiting public/animal access to the area any other risks specific to the site 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Met ✓ Not Met X				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 052 2.2	Explain how to minimise the risks to the environment when mixing and applying pesticides on own land	<p>Candidate to explain how to minimise the risks identified in 2.1</p> <p>Candidate to check and comment on wind speed and direction</p> <p>Candidate to state the reason for minimising off target application and spray drift</p> <p>Candidate to state three factors that may affect spray drift</p>	<p>Explanation to include the following points:</p> <ul style="list-style-type: none"> • use of an appropriate pesticide, preference given to product with least environmental impact • careful timing of application • check and maintain application rate • avoiding spray drift • avoid situations where run off occurs • observing buffer zones • erection of warning signs • notify neighbours before application • signage to inform the public of pesticide application <p>• use of anemometer at suitable height or visible signs</p> <p>• wind direction</p> <p>Statement to include:</p> <ul style="list-style-type: none"> • awareness of the possible effects of drift to crops, people, wildlife, water and the environment <p>May include:</p> <ul style="list-style-type: none"> • weather conditions • direction of spraying • nozzle type and size • pressure • walking speed • nozzle height • defective equipment <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 3.1 Unit 052 3.2	Read product information Interpret product information	<p>The candidate is required to read and interpret the information on a product label and provide relevant information as requested by the Assessor</p> <p>Note to the Assessor: a product label is required. It is expected that the candidate will provide the product label</p> <p>The label provided must be for a currently approved product and appropriate to the candidates normal work situation</p> <p>Note to the Candidate (Assessor also to note): It is acceptable to highlight key information on the label prior to assessment and use it to provide information to the assessor during assessment</p>	<p>The following to be tested:</p> <ul style="list-style-type: none"> • product name • active substance(s) (ingredient(s)) <p>Relevant information may include:</p> <ul style="list-style-type: none"> • field of use • crop/target • maximum individual dose • maximum total dose • maximum number of treatments • specific product precautions/warnings • operator protection • environmental protection • restrictions on use <p>Crop specific information may include:</p> <ul style="list-style-type: none"> • crop/target • dose rate • water volume • timing <p>Mixing and spraying may include:</p> <ul style="list-style-type: none"> • filling • reduced volume applications (if applicable) • recommended nozzle(s) • recommended pressure • spray quality • compatibility • additional label information <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 052 4.1	Carry out pre use checks to the sprayer/applicator	Candidate to carry out all pre-use checks relevant to the sprayer/applicator being used for the assessment Candidate to part fill the sprayer/applicator and check for satisfactory operation	To include all/any of the following: <ul style="list-style-type: none"> Sprayer/applicator de-pressurized Sprayer/applicator components to be inspected for serviceability and contamination that may include any of the following applicable to the sprayer/applicator: <ul style="list-style-type: none"> tank lid filters hoses connections seals on/off control lance straps pump (if accessible) batteries engine To include: <ul style="list-style-type: none"> sprayer/applicator checked for leaks under pressure any problems identified to be rectified if within operators level of responsibility and ability condition confirmed as suitable for operation Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 4.2	Identify suitable operating pressure and select nozzles according to application requirements	Candidate to identify and explain the use of the nozzle fitted to the applicator and one other Candidate to select the correct pressure Candidate to check nozzle is fitted correctly, it's condition and spray pattern using any appropriate method	Any two of the following: <ul style="list-style-type: none"> Deflector - medium/coarse spray quality, generally used to apply herbicides air inclusion - medium/coarse spray quality, good drift reduction properties full cone - medium/coarse spray quality, suitable for spot treatment and spraying around obstacles fan nozzle - fine, medium or coarse spray quality suitable for use with hand held applicators hollow cone - fine spray quality, generally used for insecticide and fungicide treatment To include: <ul style="list-style-type: none"> correct pressure selected for the nozzle and method of application To include: <ul style="list-style-type: none"> nozzle fitted correctly nozzle undamaged correct spray pattern for nozzle Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 4.3	Make appropriate adjustments to the application equipment	Candidate is required to demonstrate how to make adjustments to the sprayer/applicator	May include: <ul style="list-style-type: none"> altering pressure setting changing nozzles Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 4.4	Calibrate the sprayer/applicator and record relevant data	The candidate is required to calibrate the sprayer/applicator and record relevant data Candidate to record relevant calibration data Note to the Assessor: any method of calibration may be used providing it is capable of allowing for different walking speeds and spray widths and is appropriate for the applicator	Calibration to include: <ul style="list-style-type: none"> calculation of water volume rate check water volume rate against product information recommendations re-calibrate if necessary Calibration data may include: <ul style="list-style-type: none"> applicator used walking speed/time nozzle(s) fitted (spray width if appropriate) pressure setting Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 052 4.5	Measure the area to be treated	Note to the Assessor: a rectangular area of approximately 200sq metre typical of the candidates normal work situation Candidate to measure the area. The Assessor may assist under direction of the candidate	To include: • accurate measurement of dimensions required Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
Unit 052 4.6	Calculate the area to be treated	Candidate to calculate the area	To include: • accurate calculation of area required Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
Unit 052 4.7	Calculate the quantities of pesticide and water required (or amount of premix required)	Candidate to calculate quantities required for the area calculated in 4.6 and a full tank	To include: • amount of water required for specified area • amount of pesticide required for specified area • amount of water required for a full tank • amount of pesticide required for full tank or • amount of premix required Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Unit 052 5.1	Measure the required quantities and add to the sprayer/applicator, or attach pesticide container	Candidate to measure and add quantities required for the area specified in 4.6 and add to the sprayer/applicator, or attach pesticide container containing premix Note: this will normally be a simulated pesticide product	To include all of the following: • correct selection and use of PPE (as required by the product label, COSHH and Risk Assessment) • suitable site selected • fill following product recommendations and approved procedures • correct use of water supply • accurate measurement of water • accurate measurement of pesticide • avoidance of spillage or • attach pesticide container Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Unit 052 5.2	Demonstrate safe and accurate application procedures	The candidate is required to treat the area in 4.6 demonstrating safe and accurate application procedures	To include: • treatment area clearly identified • walking speed maintained • accurate switch on/off points • accurate matching of bouts • obstacles dealt with correctly (if applicable) • area treated minimising overlaps and misses • awareness of changing weather conditions and appropriate action taken (if applicable) • avoidance of off target application Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Unit 052 5.3	Carry out all activities protecting human health and the environment	Note to the Assessor: the Assessor to be satisfied that the candidate has carried out all activities protecting human health and that of the environment during the assessment process	To include: • prevention of personal injury safe working procedures followed • prevention of contamination through correct selection and use of PPE (as required by the product information, COSHH and Risk Assessment) • prevention of public/bystander contamination • safe filling procedure • avoidance of off-target application • avoidance of overdosing crop/target/plant material Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Unit 052 5.4	Complete a treatment record	The candidate is required to complete a treatment record Note to the Assessor: the treatment record must be approved or if necessary supplied by the Assessor	Completion of the treatment record must be: • accurate • legible (if handwritten) Met ✓ Not Met X	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 052 6.1	Explain how to manage surplus pesticide and dispose of waste material	<p>Candidate to explain one method of managing surplus concentrate pesticide</p> <p>Candidate to explain one way of dealing with containers</p> <p>Candidate to explain one method of dealing with waste packaging</p> <p>Candidate to explain one method of managing surplus dilute pesticides</p>	<p>Explanation may include:</p> <ul style="list-style-type: none"> return to temporary mobile store return to fixed store <p>Containers:</p> <ul style="list-style-type: none"> triple rinsed placed in secure storage until disposal returned to supplier collected by licensed waste contractor <p>Packaging:</p> <ul style="list-style-type: none"> thoroughly emptied placed in secure storage until disposal collected by licensed waste disposal contractor <p>Explanation may include:</p> <ul style="list-style-type: none"> back on to site as long as it is below the maximum dose rate use on another approved crop/target treated by specialist treatment facility on site (e.g. a lined bio bed) collected by licensed waste disposal contractor <p>Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 6.2	Describe how to clean and decontaminate the sprayer/applicator	Candidate to describe how to clean the sprayer/applicator after use	<p>May include any of the following appropriate to the sprayer/applicator:</p> <ul style="list-style-type: none"> select and use correct PPE selection of an appropriate site for cleaning the sprayer/applicator triple rinse the applicator following product information recommendations thorough flushing of system safe disposal of contaminated washings in an appropriate manner following good practice safe procedures followed <p>Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 052 6.3	State the storage requirements for the sprayer/applicator after use	Candidate to state two factors to consider when storing the sprayer/applicator	<p>May include:</p> <ul style="list-style-type: none"> de-pressurisation ensure the sprayer/applicator is clean and dry inspect for wear or damage carry out repairs lubricate if required frost protection measures implemented nozzles and filters removed prior to freezing conditions store in a secure area store under cover and out of direct sunlight <p>Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Unit 053 - Operating Machines to Apply Pesticides to own Land

Candidate A	Name:	Date:	Start Time:	Duration:
Candidate B	Name:	Date:	Start Time:	Duration:
Candidate C	Name:	Date:	Start Time:	Duration:
Candidate D	Name:	Date:	Start Time:	Duration:

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE				
				A	B	C	D	
Unit 053 1.1	Describe the legal requirements relating to applying pesticides using machinery and equipment on own land	ALL MACHINES Candidate to describe two operator's obligations in terms of legal requirements Note to Assessor: If this has already been assessed in unit 1, there is no need to re-assess in this unit	May include: <ul style="list-style-type: none"> Comply with current Pesticides Codes of Practice ensure that all required guards are in place and in good condition comply with all relevant road traffic regulations when operating or transporting on the public highway comply with The Plant Protection Products (Sustainable Use) Regulations 2012 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Unit 053 1.2	Describe how to apply pesticides safely using machinery following industry best practice on own land	ALL MACHINES Candidate to describe one operator safety regulation in terms of using sprayer/application equipment ALL MACHINES (as appropriate) Candidate to describe two precautions the operator may take to protect themselves from pesticide contamination when operating the prime mover	May include: <ul style="list-style-type: none"> comply with codes of best practice be aware of any safety implications imposed by Risk/COSHH assessment and comply with the requirements 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			Cabbed: <ul style="list-style-type: none"> fit carbon filter use of in-cab controls ensure ventilation system is functional close all windows contaminated PPE stored in external locker 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			Open canopy/platform: <ul style="list-style-type: none"> use of appropriate PPE avoid siting pressurised components within confines of canopy 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			ALL MACHINES When preparing the prime mover and sprayer/application equipment, the candidate is to describe two checks which the operator may carry out to protect themselves from physical danger during operation	May include: <ul style="list-style-type: none"> compatibility of prime mover and sprayer/application equipment front weights wheel track width correct tyre pressures condition of tyres brake function 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			ALL MACHINES Candidate to state three aspects of safe practice to be considered when driving on uneven/sloping terrain	May include: <ul style="list-style-type: none"> assess conditions select four wheel drive (if fitted) appropriate speed correct gear selection effect of changing load on stability use of weights to stabilise prime mover correct turning procedure keep centre of gravity as low as possible 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			ALL MACHINES Candidate to state one consideration for safe driving on a public highway	May include: <ul style="list-style-type: none"> independent brakes coupled together travelling at high speed makes vehicle unstable 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			Met ✓ Not Met X	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

CRITERIA NUMBER	ASSESSMENT CRITERIA	ASSESSOR GUIDANCE	ASSESSMENT ACTIVITIES	CANDIDATE			
				A	B	C	D
Unit 053 2.1	Identify risks to the environment from mixing and applying pesticides	ALL MACHINES Candidate to identify five risks to the environment	<p>May include any of the following:</p> <ul style="list-style-type: none"> • 'run off' if the ground conditions are not suitable • pollution of water courses • pesticide entering drains • pollution of boreholes, water protection zones • pesticide contamination of environmental margins • detrimental affect on wildlife • application to non-target plants • damage to sensitive crops/areas • damage to hedgerows • affecting housing • limiting public/animal access to the area • any other risks specific to the site <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unit 053 2.2	Understand how to minimise risks to the environment from mixing and applying pesticides	<p>ALL MACHINES Candidate to explain how to minimise the risks identified in 2.1</p> <p>ALL MACHINES Candidate to state the reason for minimising spray drift</p> <p>SPRAYERS/GRANULAR APPLICATORS Candidate to check and comment on wind speed and direction</p> <p>SPRAYERS Candidate to state five factors that affect spray drift</p>	<p>Explanation may include the following points:</p> <ul style="list-style-type: none"> • check and maintain application rate • observe buffer zones • comply with LERAP requirements • inform neighbours • erect warning signs • use an appropriate pesticide • careful timing of application • avoid spray drift (sprayers only) <p>ALL MACHINES • awareness of the likely effects of off-target application</p> <ul style="list-style-type: none"> • visible signs or use of an anemometer at suitable height • wind direction <p>May include:</p> <ul style="list-style-type: none"> • weather conditions • direction of spraying • restrictor size • air pressure • fluid pressure • forward speed <p>or</p> <ul style="list-style-type: none"> • boom height (boom sprayer) • angle of boom (variable geometry boom sprayers) • downward air pressure (air assisted boom sprayers) • air assistance speed and volume (air assisted broadcast sprayers) <p style="text-align: right;">Met ✓ Not Met X</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
